

## **ENANTHOL 250**

**Testosterone Cypionate 250mg per ml.**

**FOR INTRAMUSCULAR USE ONLY.**

### **DESCRIPTION:**

Testosterone cypionate is a long life esterification of natural occurred androgen hormone Testosterone.

As with all the esterifications of testosterone (unless testosterone base) it has a modified release pattern to avoid daily injections.

The testosterone esterifications are used to treat medical conditions such Hypogonadism.

Testosterone cypionate is a long lasting esterification that allows the administration each 20 days when used for medical conditions treatments.

For fitness purposes the typical procedure is the weekly use or even each 5 days .

### **ADMINISTRATION:**

Cypibol 250mg is given by deep intramuscular injection only.

### **DOSAGE:**

For hypogonadism treatments the weekly doses are close to 125mg.

For fitness purposes the typical doses in males are 250-500mg weekly.

### **PRECAUTIONS:**

The use of any esterification of testosterone may induce precocious puberty in childs and under 20 years patients, if signs of precocious prepuberty occurs the treatment must be discontinued.

Since androgens may cause fluid retention Cypibol 250 must be used with caution in patients with epilepsy, migraine, asthma, and cardiac or renal disease.

**ADVERSE REACTIONS:**

Headhache, irritability, edema, restlessness, depression, tiredness, precocious prepuberty, gynaecomastia, and pain at the site of the injection.
