

DECABOL 200

Nandrolone Decanoate 200mg per ml.

FOR INTRAMUSCULAR USE ONLY.

DESCRIPTION:

Nandrolone decanoate is a long life androgen similar to natural occurred androgen hormone Testosterone.

As with all the androgen sterification compounds it has a modified release pattern to avoid daily injections.

This compound is used to treat medical conditions such Hypogonadism.

Nandrolone decanoate is a long lasting esterification that allows the administration each 20 days when used for medical conditions treatments.

For fitness purposes the typicall procedure is the weekly use.

ADMINISTRATION:

Decabol 200mg is given by deep intramuscular injection only.

DOSAGE:

For hypogonadism treatments the weekly doses are close to 125mg.

For fitness purposes the typicall doses in males are 400-600 mg weekly.

PRECAUTIONS:

The use of any androgen may induce precocious puberty in childs and under 20 years patients, if signs of precocious prepuberty occurs the treatment must be discontinued.

Since androgens may cause fluid retention Decabol 200 must be used with caution in patients with epilepsy, migraine, asthma, and cardiac or renal disease.
