

MASTEROL 100

Drostanolone Propionate 200mg per ml.

FOR INTRAMUSCULAR USE ONLY.

DESCRIPTION:

Drostanolone Propionate is a short life androgen similar to natural occurred androgen hormone Testosterone.

As with all the androgen sterification compounds it has a modified release pattern to avoid daily injections.

This compound is used to treat medical conditions such Hypogonadism.

Drostanolone Propionate is a short lasting esterification that allows the administration each 2-3 days when used for medical conditions treatments.

For fitness purposes the typical procedure is the daily use.

ADMINISTRATION:

Masterol 100mg is given by deep intramuscular injection only.

DOSAGE:

For hypogonadism treatments the weekly doses are close to 200mg.

For fitness purposes the typical doses in males are 200-400 mg weekly splitted in EOD applications.

PRECAUTIONS:

The use of any androgen may induce precocious puberty in childs and under 20 years patients, if signs of precocious prepuberty occurs the treatment must be discontinued.

Since androgens may cause fluid retention Masterol 100 must be used with caution in patients with epilepsy, migraine, asthma, and cardiac or renal disease.

ADVERSE REACTIONS:

Headache, irritability, edema, restlessness, depression, tiredness, precocious prepuberty, gynaecomastia, and pain at the site of the injection.

CONTRAINDICATIONS:

Precocious puberty, prostatic carcinoma or another androgen dependent neoplasia, allergy reaction to testosterone or any of the compounds of this formulation.
